

Muhammad Talha

.NET Backend Developer | Full Stack Developer | DevOps Enthusiast
+92 318 648 0713 | talhaleet@gmail.com | github.com/talhaleet | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Detail-oriented Software Engineering student with hands-on experience building full-stack web applications using .NET MVC, Node.js, and React. Skilled in designing relational database schemas, building RESTful APIs, and deploying applications on IIS and cloud platforms. Completed a Cloud & System Administration internship at Xavor Corporation, gaining real-world DevOps exposure. Passionate about clean code, Agile teamwork, and scalable backend architecture. Actively seeking internships in .NET Backend, Full Stack Development, or DevOps engineering.

TECHNICAL SKILLS

.NET & Backend	C#, ASP.NET MVC, Blazor, Razor Pages, Node.js, Express.js, REST APIs, Microservices
Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, WordPress
Languages	C#, JavaScript, Python, C, C++, Kotlin
Databases	MySQL, Oracle Database, SQL Server, SQLite — schema design & query optimisation
DevOps & Cloud	Docker, Git, GitHub, IIS Manager, Google Cloud, Cloudinary, Hostinger
Testing & QA	Postman, Selenium, JMeter, k6, OWASP ZAP — functional, load & security testing
Design & AI Tools	Figma, Canva, Lovable, Claude, ChatGpt, Gemini, Base44, Replit

EDUCATION

B.Sc. Software Engineering | **Punjab University College of Information & Technology, Lahore** (CGPA=3.03) 2023-27

FSc. Pre Engineering | **Punjab Group of College, Sahiwal** (Grade = A+) 2021 – 2023

PROFESSIONAL EXPERIENCE

Cloud & System Administration Intern | **Xavor Corporation — Lahore, Pakistan** Jun – Aug 2023

- Observed and learned cloud infrastructure operations, gaining understanding of system reliability, monitoring practices, and production environment workflows.
- Assisted in exploring cloud environment setup concepts, including basic exposure to CI/CD pipelines, server provisioning, and troubleshooting processes.
- Studied OWASP security best practices, system performance optimization techniques, and contributed to documentation to support team knowledge-sharing.

PROJECTS

QuickFood – Food Delivery Web App | .NET MVC, C#, SQL Server quickfoodi.runasp.net [GitHub](#)

- Architected a full-stack food delivery platform featuring restaurant listings, dynamic cart management, real-time order tracking, and secure role-based authentication for admins and customers.
- Designed normalised SQL Server schema, implemented RESTful controller actions, integrated session management, and deployed live on IIS with environment-based configuration.

Trendora – E-Commerce Clothing Platform | .NET MVC, C#, SQL Server trendora.runasp.net [GitHub](#)

- Built an end-to-end clothing e-commerce site with product catalog, shopping cart, order management, and user authentication — deployed live via IIS Manager.
- Optimised SQL Server performance through indexing and server-side caching, reducing page load times and improving scalability under concurrent user load.

Library & School Management Systems | Node.js, Express.js, MySQL [GitHub](#) || [GitHub](#)

- Developed two Node.js/Express backend systems: a Library app for cataloging and loan tracking, and a School Management System for student records, attendance, and grade reporting.
- Built RESTful APIs with full CRUD support, structured normalised MySQL schemas, and enforced data integrity with validation middleware.

30+ Frontend & Backend Mini Projects | [GitHub](#) | [Portfolio](#)

- Diverse projects spanning React, Node.js, .NET, and Python — covering auth systems, REST APIs, responsive UIs, and database-driven applications across various technology stacks.
